

# Yong Thu La Wong

West Covina, California

626-678-7040 [yongthulawong@gmail.com](mailto:yongthulawong@gmail.com) [linkedin.com/in/yong-thu-la-wong](https://www.linkedin.com/in/yong-thu-la-wong) [github.com/yxngles13](https://github.com/yxngles13)

## Education

### California State Polytechnic University, Pomona

Pomona, CA

*B.S. in Computer Science, Minor in Artificial Intelligence | GPA: 3.69/4.00*

*Expected December 2027*

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Systems Programming, Database Systems, Computer Networks, Formal Languages & Automata, Machine Learning, Computer Vision

## Experience

### California State University, Chancellor's Office

June 2026 – Present

*Software Engineering Intern*

*Remote*

- Built, deployed, and maintained administrative tools for the CSU Student Success Dashboard, including messaging, user-management, and usage-tracking systems supporting centralized workflows across 20+ CSU campuses.
- Delivered frontend and backend features within an Agile Scrum team, translating product requirements into production functionality using PHP, Laravel, JavaScript, jQuery, MySQL, and AWS RDS.
- Designed RESTful APIs and database-backed workflows using Laravel MVC and Eloquent ORM, enabling administrators to manage users, messages, and platform activity.
- Wrote PHPUnit tests and used Git-based CI/CD workflows to validate and deploy changes, diagnose defects across the application stack, and prevent production regressions.

### Cadence Design Systems

Aug. 2025 – Dec. 2025

*Machine Learning Engineer Fellow*

*Remote*

- Cleaned and preprocessed 48M+ Amazon product reviews using Python, Pandas, and NLTK, building a text-processing pipeline to prepare large-scale review data for downstream NLP model training.
- Fine-tuned BERT-Base Uncased using Hugging Face Transformers for multi-class sentiment analysis, achieving 87% accuracy across positive, neutral, and negative review classifications.
- Developed an aspect-based sentiment analysis pipeline using PyABSA to extract product features and analyze feature-level sentiment across 51K reviews, identifying customer pain points and features to preserve or redesign.
- Built an interactive analytics dashboard that transformed unstructured review data and model outputs into product-level insights, and presented the system and findings to Cadence Design Systems stakeholders.

### California State Polytechnic University, Pomona

Spring 2025

*Research Assistant*

*Pomona, CA*

- Supported deep learning research for histopathological image classification, preprocessing and annotating image datasets using Python, NumPy, and Pandas to prepare training data and improve model performance.
- Developed and evaluated an image classification model with a faculty researcher, analyzing experimental results and iterating on data preparation and model performance.

## Projects

### Eye Tracking Analysis – Senior Project

June 2026 – Present

*WebGazer.js, Laravel, PHP, MySQL*

- Developing and integrating a web-based eye-tracking system into the CSU Student Success Dashboard, capturing gaze coordinates and mapping user attention to underlying HTML elements for interface analysis.

### Project Sloka (Newtonianisotope)

May 2025 – Dec. 2025

*React, TypeScript, PostgreSQL, Google Cloud Platform (GCP)*

- Built a full-stack platform using React and TypeScript on the frontend with PostgreSQL and GCP on the backend, implementing secure authentication, RESTful APIs, real-time features, and role-based access control (RBAC).

### BrainHive (CalHacks 11.0)

2024

*Next.js, Gemini AI, D3.js, TailwindCSS, Firebase | [Live Demo]*

- Built a full-stack AI-powered platform at a 36-hour hackathon with real-time D3.js data visualization and Firebase live sync.

## Technical Skills

**Languages:** Java, TypeScript, JavaScript, Python, PHP, SQL, C++, HTML/CSS

**Frontend:** React, Next.js, Bootstrap 5, Tailwind CSS, jQuery, Highcharts, D3.js

**Backend & Databases:** Laravel, Flask, Node.js, REST APIs, MySQL, PostgreSQL, MongoDB

**Cloud & DevOps:** AWS RDS, Google Cloud Platform, Firebase, Docker, Git/GitHub, GitHub Actions, CI/CD

**AI/ML:** Gemini API, Hugging Face Transformers, BERT, PyTorch, TensorFlow, scikit-learn, PyABSA, NumPy, Pandas

**Development Practices:** Object-Oriented Programming, MVC, Unit Testing, Debugging, Agile, Scrum, Software Development Lifecycle
